About Pre-Purchase Inspections

This report has been compiled based on the results of the inspection performed by a qualified, specially trained inspector. The report demonstrates the condition of the vehicle based on a comprehensive visual inspection and road test of the vehicle **at the time of the inspection**.

The inspection report documents specific inspection points, a test drive & performance qualities, and dozens of condition photos of the exterior, interior, underhood, drivetrain, chassis and undercarriage of the vehicle.

Please Note:

Under most circumstances, the inspector will drive the vehicle in order to best determine the vehicle's handling and overall roadworthiness. However, in certain instances, the vehicle owner is reluctant to have persons other than themselves drive their vehicle, even though our inspectors are highly qualified to do so. **In those cases the seller is requested to drive the vehicle following instructions provided by the inspector and the inspector will ride along and observe the vehicle characteristics during that test drive.**

Also, our inspectors do not use tools and are not permitted to unseal, disassemble, or otherwise handle any hidden vehicle components. They can only document what they can observe in ambient light or with a flashlight.

Also, sellers will not generally allow any disassembly of the vehicle for testing or diagnosis. Therefore, our inspectors do not perform any disassembly of the vehicle for their testing purposes. In addition, because our inspections are mobile, there rarely are lifts available that would allow us unimpeded physical access underneath the vehicle. The inspection report was specifically designed to extract specific information from various systems and components through visual inspection techniques, vehicle performance characteristics and specific road testing observations.

Reminder:

Most classic vehicles are generally going to have, at a minimum, some type of minor defects. Some defects, and the degree of defect, are more subjective than objective. Subjectivity can sometimes result in slightly different opinions and observations.

The inspector cannot provide you with advice on whether to purchase or not purchase this vehicle.

The inspector makes no representations or warranties regarding its service in consideration of vehicle design, compliance with manufacturer specifications, operation, mechanical condition, safety, authenticity, provenance, title history, registration history, or market value of any vehicle inspected, or of any component parts.

How To Use This Report

FOR BUYERS:

In order to maximize the information and value this report provides, the inspector recommends using this report to:

1. Determine the accuracy of the owner's description and confirm their statements of condition.
2. Follow up with the vehicle owner regarding any new concerns raised from the inspection
3. Provide support during negotiations with the vehicle owner or for estimating vehicle repair costs.
4. Get a better idea of valuation when combined with further research to make a more informed decision.
5. Compare the condition of this vehicle to the condition of others like it that you are considering.

Final Thoughts:

Paint chips near drivers door handle, 4 or 5 small chips on front bumper.
Slight paint color difference on passenger door (possible repaint).

Overall this is a nice, fun to drive, and well cared for Alfa. The minor cosmetic imperfections are unoffensive, the leater is in fantastic shape, and the driving expereince is engaged. Our impressions of this car are good.
